HEAR IT FROM THE TEAM

Watch the Story

A quick conversation with the Westgrove Dental Care team about what changed once the phones started ringing from Google.

Interview with Dr. Brandon & Dr. Iris Skenandore · Westgrove Dental Care

THE CHALLENGE

A great practice that Google was hiding

Westgrove Dental Care is a beloved, 5-star practice in Garden Grove — but online, hardly anyone could find them. Their website barely showed up when people searched for a dentist nearby, so all those potential patients were quietly being handed to competitors instead.

Almost invisible in search. The site ranked for only a small handful of terms — and not the ones people actually type when they're ready to book.

Very few websites linked to them. Google trusts businesses that other sites vouch for. Westgrove simply didn't have that web of support yet.

Low website traffic. A wonderful team and perfect reviews, but not enough new people were ever landing on the website to discover them.

WHERE THEY STARTED

65

keywords on Google (late 2025)

THE GOAL

Get Westgrove in front of every person in Garden Grove searching for a dentist — and turn that visibility into phone calls and booked appointments.

THE PROCESS

What we actually did

No gimmicks — just the proven fundamentals that make Google (and real patients) take notice, done consistently every single month.

1

Built pages around what patients search

We rewrote and organized the website around the exact phrases real people use — like **"dentist in Garden Grove"** and **"emergency dentist near me"** — so Google clearly understands what Westgrove offers and who to show it to.

2

Supercharged the Google Business Profile

We optimized the Google Maps listing with fresh photos, posts, accurate info, and a steady review strategy. Today Westgrove ranks **#1 on the map across nearly half of Garden Grove** and pulled in **44 calls straight from Google** in a single month.

3

Earned trust with quality backlinks

We steadily built links from other reputable websites back to Westgrove. Think of each one as a recommendation that tells Google "this practice is legit." That trust now adds up to **701 backlinks from 396 different websites**.

4

Published helpful, patient-friendly content

Fresh blog articles answering the real questions patients ask — about chipped teeth, clear aligners, tooth pain and more — which keeps bringing new visitors in month after month and widens the net of keywords Westgrove ranks for.

5

Got ready for AI search

We structured everything so Westgrove shows up not just in classic Google results, but also in the new AI answers (like Google's AI Overviews) that more and more patients now rely on to pick a dentist.

THE RESULTS

The numbers tell the story

In under a year of steady work, Westgrove went from hard-to-find to one of the most visible dentists in Garden Grove. Here's the proof — all from real tracking tools.

184

Keywords on Google

Up from 65 — nearly 3× more searches now bring up Westgrove

701

Backlinks Earned

From 396 different websites vouching for the practice

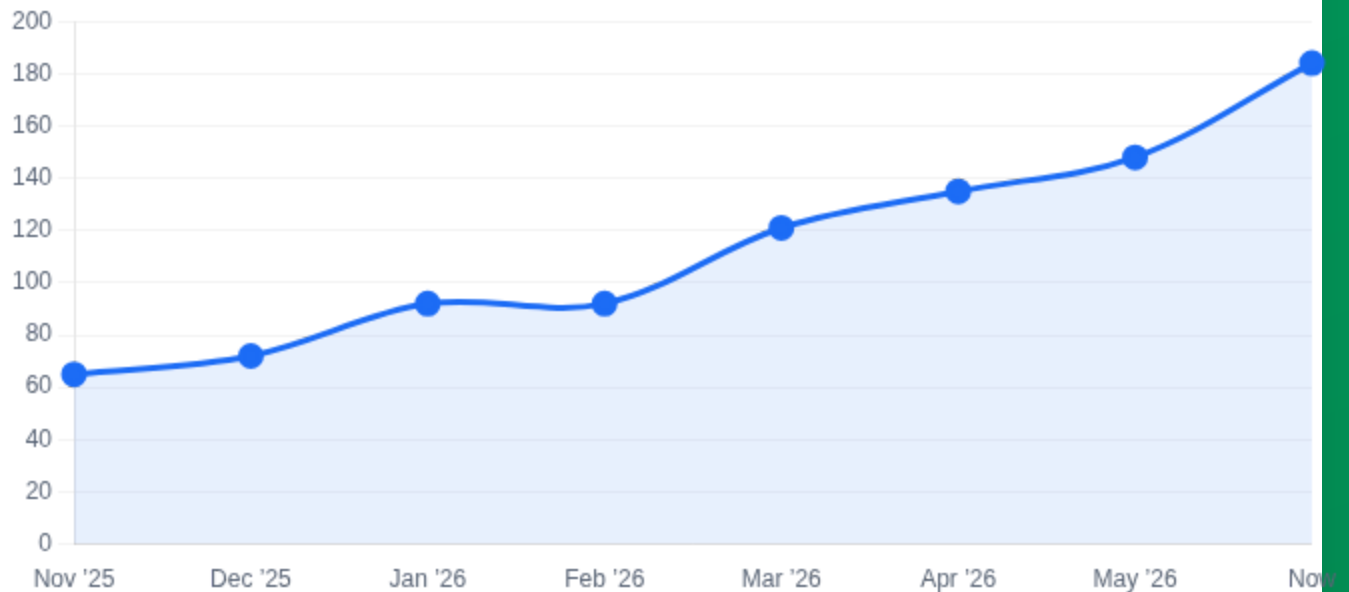

975

New Website Visitors

New people who found the site in the last 12 months

Keywords ranking on Google — month by month

The steady climb from 65 keywords to 184 as the work compounded.

AND THERE'S MORE

Wins beyond the headline numbers

#1 on the map across Garden Grove

Westgrove ranks first on Google Maps across nearly half the city for "dentist in Garden Grove" — owning over 50% of the local spotlight.

A perfect 5.0★ reputation

266 Google reviews and still a flawless 5.0 rating — the kind of social proof that turns searchers into booked patients.

The phone is ringing

44 calls came straight from the Google listing in a single month — a six-month high and real patients, not just clicks.

Top-5 for the searches that matter

Ranks in the top 5 for "dental care Garden Grove," "dentist in Garden Grove," and other high-intent local searches.

"We went from wondering if our website even worked to having new patients tell us they found us right at the top of Google."

— THE WESTGROVE DENTAL CARE TEAM
