THE CHALLENGE

[Westgrove Dental Care](#) is a beloved, 5-star practice in Garden Grove — but online, almost nobody could find them. With only **65 keywords** ranking and very few websites linking to them, they were missing the searches that drive new patient bookings.

- 1 **Almost invisible in search.** The site ranked for only a small handful of terms — and not the ones people type when they're ready to book.
- 2 **Very few sites linked to them.** Google trusts businesses other websites vouch for, and Westgrove didn't have that support yet.
- 3 **Not enough new visitors.** A wonderful team and perfect reviews — but too few new people were ever landing on the website.

Keywords ranking on Google over time

Month ▼

Source: Semrush · keyword footprint grew from 65 to 184 in under a year.

The biggest gap? They were invisible for the **most valuable local searches** people use when they're ready to book a dentist right now.

THE PROCESS

No gimmicks — just the proven fundamentals that make Google (and real patients) take notice, done consistently every month.

1. SERVICE PAGE OPTIMIZATION

We rebuilt the website around the exact phrases real people search — like **"dentist in Garden Grove"** — so Google clearly understands what Westgrove offers and who to show it to.

2. GOOGLE BUSINESS PROFILE OPTIMIZATION

Fresh photos, posts, accurate info and a steady review strategy. Today Westgrove ranks **#1 on the map across nearly half of Garden Grove** and pulled in **44 calls from Google** in one month.

3. BACKLINK & AUTHORITY BUILDING

We steadily earned links from other reputable websites pointing to Westgrove — each one a vote of confidence to Google. That now adds up to **701 backlinks from 396 different sites**.

4. PATIENT-FOCUSED KEYWORD STRATEGY

We targeted the high-intent searches patients actually use, prioritized urgent ones like emergency care, and published helpful, easy-to-read articles every month.

5. AI SEARCH VISIBILITY

We structured everything so Westgrove shows up not just in classic Google results, but also in the new AI answers (like Google's AI Overviews) that more and more patients now use to choose a dentist.

THE RESULTS

In under a year of steady work, Westgrove went from hard-to-find to one of the most visible dentists in Garden Grove. Here's the proof — all from real tracking tools.

#1 on Google Maps across nearly half of Garden Grove for "dentist in garden grove"
